This term Mrs Quayle and Year 5 have been given the task to take care of the veggie garden and run the Green Team.

For the past 6 weeks we have been very busy in Green Team. Starting totally from scratch, we have planted a variety of seeds in the greenhouse. We have planted basil, carrots, beetroot, broccoli, rocket, cauliflower, snow peas, red onions, cabbage, spring onions, radishes and peppermint. The greenhouse veggies, fruits and herbs have already started sprouting and are nice and green.

Outside in the garden beds we have been taking out the weeds and aerating the soil to prepare them for when we plant our seedlings. We are quite lucky and have some lovely watermelon and rockmelon growing from last year. They will be ready to harvest at the end of the week.

The Green Team is having lots of fun and learning about gardening so keep your eye out for our updates in the newsletter.
